

TS_{rl} Spinning mill - Dyeworks
Tintoria filati Sala s.r.l.

Specialist yarn dyers and spinners.

Tintoria Sala is located in Merone, Italy, It has state-of-the-art equipment and technology. Tintoria Sala works together with their clients to find ideal solutions for the best outcome of any kind of fibre. This makes Tintoria Sala a leading company in the home textile industry.

The laboratory is the pride of Tintoria Sala. There they can control all materials, perform thorough tests, monitor their work and check the outcomes, carry out colour sampling and develop new dyeing processes. It is thanks to laboratory activity that they can also meet requests for small quantities, between 1 and 10 kg.

The vast machinery fleet that Tintoria Sala can rely on, consisting of 26 autoclaves, enable them to meet any production needs, from 30 to 1000 Kg per colour, and to clear orders fast, providing a high-quality, efficient service. The potential production capacity of the equipment at Tintoria Sala can reach over 20.000 Kg of processed yarn a day. All yarns are inspected before delivery to our clients. We check: colour accuracy, required fastness and visible faults, if any.

TREVIRA FIBRE*
Synthetic fibre with high technological value Trevira fibre is one of the most widely recognized brands at international level and on which the majority of yarns manufactured by Tintoria Sala are based on it. Its flame retardant technology meets the most demanding safety requirements. Their Trevira CS Club Silver Member award only reserved to the most important users, proves how strongly Tintoria Sala believes in the Trevira Fibre, which it has been prizing and promoting on the market.

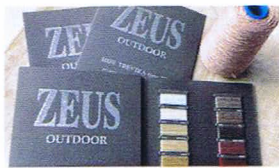

ZEUS

Synthetic with natural look. This innovative yarn is produced by Tintoria Sala in 100% Trevira, a material that can realistically reproduce viscose-linen fabrics, with their typically uneven and natural look. A real cutting-edge product, and so special as to be patented. Its unique manufacturing method donates the creation of a natural, uneven effect of a synthetic fireproof fabric, as is usually obtained by blending light viscose fibres with dark linen ones. The two-tones dyeing only requires one bath. Production ranges from one single cone to large scale.

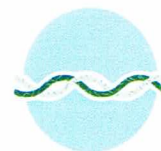

ZEUS LOW PILLING

After months of study they are proud to present the variant of our article Zeus - 100% Trevira CS - with high performance at the pilling test. Strongly requested by the textile world specialized in seating furniture, we are now able to give new life to an article already well known thanks to its viscose linen effect with all the characteristics of Trevira CS brand.

ZEUS OUTDOOR

Research and development have always been the main themes of Tintoria Sala, during the last Heimtextil 2018 was presented a new variant of our article Zeus - 100% Trevira CS - : the viscose linen effect is now ready to be used also in outdoor furnishing complements.

ONE YARN, TWO COLOURS, ONE BATH

Double dyeing.

A single yarn can be dyed in two different colours in order to obtain a mélange effect, optimizing dyeing time and production costs.

ONIL: LINEN EFFECT IN TREVIRA CS

When nature meets Trevira CS. Introduced during Heimtextil 2018, our new article Onil - 100% Trevira CS - has all the visual and tactile characteristics of linen: lightness, two-colored details and irregularities, an article of high quality and ductile in its various shapes and colors that Tintoria Sala offers.

SATURNO

What makes this yarn unique is the special faded effect that results in uneven, shot fabrics: a trait that opens up to creative solutions, especially for home décor. Blended with other yarns, it results in distinctive effects that enhance the final result. However, it may be used on its own to manufacture naturally uneven textiles. Made of 100% Trevira, it is fire retardant and is available in an ever expanding wide range of colours, with an ever expanding palette.

GUBBIO

A 100% Trevira article. Blended with yarns in different counts, it can be used to manufacture textiles with uneven effects, both in colour and in hand. Any colour can be obtained in a single-dyeing process.

**Also An Extensive Range of...
Non FR- Wool, Linen and Viscose
Blends**

Nm 3 and finer with neps, slubs and colour interest such as qualities 'King', 'Cardiff', 'Marsiglia', 'Nizza', 'Tweed', 'India' and many more.
